for use after July 1, 1963

KINEMATIX IMP II

AMAZING NEW LOW-COST FM WIRELESS MICROPHONE

(It's actually a shirt-pocket FM transmitter)

- **COMPACT**—built-in microphone, so small it fits into a pack of cigarettes.
- **COSTS SO LITTLE**—far less than ever before possible.
- **PERFORMS** with perfect fidelity without restraining wires or cables. Free of static and background noise.

Just tune to blank spot between 88-108 mc on any FM tuner, table model, portable, or car FM and begin broadcasting. You'll come through loud and clear up to 200 ft. away.

Use IMP II:

- with a large-speaker FM radio as a public address system,
- as an easily-concealed wireless microphone for theatrical and TV productions,
- with a tape recorder for surveillance work (the sensitive IMP II microphone picks up voices from 40 ft. away),
- to take inventory in plants and stores with a stationary tape recorder,
- as a highly-sensitive baby sitter or burglary detector (the IMP II easily transmits to an FM portable in the back yard),
- as a device for waitresses to call in orders to the kitchen,
- for outdoor events, sports events, or square dancing where a mobile PA is used,
- to tape record floor salesmen's conversations to improve selling techniques,
- as an attention-getting device in store windows to enable customers to converse with the salesmen,
- as a burglar alarm,
- to transmit sound of a phone ringing to back yard, basement or other remote area.

SPECIFICATIONS

Material: Chrome-plated steel

Tunable: 88-108 mcs.

Range: 175-225 ft. (with built-in microphone, voice picked up clearly in a quiet room from 40 ft. away)

Frequency Response: 30-20,000 cps

Input Impedance (for external microphone input): 1000 ohms

Dear Sir:

This is form letter X-401.

I hope I guessed right when I decided you'd prefer the speediest possible reply, with all the information, to one of my secretarial masterpieces a week later.

If after reading the enclosed literature you would like to purchase a unit as a sample, Kinematix will be pleased to promptly accomodate you. If for any reason the IMP II is not what you expected, we'll be happy to accept your return within five days for a full refund.

If you have any application which requires the transmission of information over relatively short distances, with perfect fidelity, no background noise, no interference, and at an extremely low price, you must try our little FM transmitters. Despite the IMP II's low price, it is an extremely sophisticated product, which is generally considered to outperform the \$500.00 competition.

If a quantity purchase is made within six months of the sample order, we will rebate any difference in price between that order and your sample. A quantity price list is available for industrial and O.E.M.. accounts on request.

Again, for the sake of speed and efficiency, if you wish you may telephone me at the above number, COLLECT of course, to place your order. We look forward to hearing from you.

IMPishly yours,
KINEMATIX, INC.
